

$$80 \times -204 + 452$$

## Actividad calificable 1 geometria.

1

$$\frac{100 + 80 + 110}{2} = 235$$

$$\sqrt{235 \cdot (235 - 100) \cdot (235 - 80) \cdot (235 - 110)}$$

$$K = 40.096,771.93 \text{ km}^2$$

2

$$a^2 = 23 = \sqrt{23}$$

$$K = 4.795337523 \text{ km}$$

3 euclides.

$$a^2 = 30^2 + 20^2 + 30 \times 20$$

$$K = \sqrt{1900} = 43.58893944 \text{ km}$$
